

Hello,

My name is Michał Kikowski, and I am an enthusiastic web developer, deeply committed to continuous learning and skill enhancement. I dedicate around 40 hours each week specifically to advancing my programming skills. I am highly adaptable and eager to learn and master the technologies your team uses.

To date, I have completed 12 projects and 15 courses, which has equipped me with a solid foundation and an insatiable drive to grow. I am hardworking and relentless in my pursuit of improvement, always aiming to make meaningful contributions. I am currently seeking an opportunity within a company that values both dedication and development.

I am open to any positions, internships, or part-time roles, and I am flexible regarding employment type, including contract or B2B. I'm happy to start with a modest salary to prove my skills and commitment. Based in Warsaw and Łódź, I am enthusiastic about the possibility of collaborating with your company.

Best regards,
Michał Kikowski
